

14.-15.05.13 Informa's Filing Variations 2013
Implementing a regulatory strategy for filing variations
Led by Dr. Mónica Unger-Bady

Feedback from attendants:

What attracted you to the workshop?

- Understand in which level we are in our company concerning variations
- I wanted to hear experiences
- Opportunity to share experiences with other companies
- The possibility to meet with colleagues from other companies and to have the possibility to hear about other solutions
- I am now in the RA department so I have to learn how to fill variations
- Getting ideas from people outside your own company

What did you find of most value and why?

- Experience of others, Discussions about the implementation dates
- I notice that our company has quite good knowledge how to handle variations
- Opportunity to share experiences with other companies
- Discussions around specific things like strategy, implementation and tracking
- Share experiences with other people who have the same concerns
- The feedback from the course leader and the other attendees

What are your suggestions for improving the session (eg format, content, timing, speaker)?

- More examples about the way to do issues
- More focus on training, not asking from backgrounds of those who attend. More slides and examples
- Too short time as discussions always tend to take more time than accounted for
- To have more practical examples
- Format etc are good, maybe a few more attendees but not too much though. Now you got the chance to ask your questions

How did you rate the workshop speaker?

- I did not learn very much
- Excellent! Very experienced and knowledgeable
- Monica is a very experienced person and good at explaining
- She knows what she is talking about and keeps the attention to the subject

Please sum up the workshop in one or two sentences

- It was nice to discuss together about the same issues. It was pleasant atmosphere
- Very nice workshop, friendly atmosphere. Part of people did not have very much to share – poor outcome. Would be helpful if the trainer could show some examples from her experiences in that kind of cases. We could still discuss together.
- Was great to hear the solutions other companies have to the same problems

- An excellent opportunity to discuss with colleagues and more experienced persons
- Interactive way of setting a strategy to fill variations with efficiency
